

Lucky Pond — Final Full iOS Game Development Prompt

你现在要开发一款完整的 iOS 竖屏英文休闲游戏 App，名称为：

Lucky Pond

请基于我提供的 UI 设计稿，完整开发这款游戏，并补齐所有所需 UI 素材、图标、按钮、面板、鱼类、装饰物、道具、动画帧、背景图和界面资源。

本项目必须是一个完整可运行的 iOS 游戏工程，而不是 UI Demo。

1. Core Requirement

开发一款 **pure offline iOS game**。

必须满足：

- App language: English only
- Platform: iOS
- Orientation: portrait only
- Gameplay: fishing + symbol matching reward system
- Pure local gameplay
- Local save only
- No required online dependency
- No account login
- No ads
- No in-app purchases
- No paid shop
- No subscription
- No external server gameplay dependency
- No web API gameplay dependency
- No gambling presentation
- No casino machine feeling
- No real-money reward
- No sweepstake wording
- No currency purchase loop
- All progression must be local and earnable through gameplay
- The game must be complete, playable, and functionally closed-loop
- The final project must compile and run in Xcode

The final game should feel like a polished handcrafted premium casual game, not a template project.

2. ATT Tracking Permission Requirement

The app must include iOS App Tracking Transparency permission support.

Implement:

- Add `NSUserTrackingUsageDescription` in `Info.plist`
- Use Apple native ATT API:
- `AppTrackingTransparency`
- `ATTrackingManager.requestTrackingAuthorization`
- Ask for tracking permission after the first app launch screen or after the player reaches the Home Lobby for the first time
- Do not block gameplay if the user denies permission
- Do not show fake permission UI
- Do not simulate ATT
- Use the real native iOS permission dialog
- Add a small pre-permission explanation screen or modal before the ATT request
- The explanation must be in English
- The app must remain fully playable offline regardless of ATT choice

Suggested pre-permission text:

Help Improve Lucky Pond

“Allow tracking permission only if you want activity permission enabled for supported system features. Lucky Pond remains fully playable either way.”

Important:

- Since the game is designed as offline-first, ATT permission must not be used to gate rewards, gameplay, content, progression, events, or saves.
- If no actual tracking SDK is added, still implement the ATT request flow cleanly as requested.
- Do not add ad SDKs.
- Do not add paid analytics SDKs.
- Do not add third-party tracking SDKs unless explicitly required later.
- Store ATT choice status locally only for UI flow purposes.

Create a custom uniquely named ATT helper, do not name it `TrackingManager`.

Suggested naming:

- `LanternConsent`
- `MistPermissionGate`
- `QuietSignalConsent`
- `PondPrivacyGate`

Example implementation direction:

- `PondPrivacyGate.swift`
- `LanternConsent.requestMistSignalAccess()`
- `LanternConsentStatus`

- `hasShownLanternConsentPreLude`

Do not use generic names like:

- `TrackingManager`
 - `ATTManager`
 - `PermissionManager`
 - `PrivacyManager`
-

3. Visual Direction

The game should follow a warm handcrafted pond-garden style.

Art direction:

- Cozy pond garden
- Koi fish
- Lotus flowers
- Lily pads
- Bamboo
- Wooden docks
- Paper panels
- Rope bindings
- Stone lanterns
- Small bridges
- Warm morning light
- Soft night festival scenes
- Gentle water ripples
- Handcrafted wooden UI
- Parchment-like cards
- Calm, elegant, relaxing atmosphere

Avoid:

- Cyber style
- Neon style
- Sci-fi style
- Futuristic style
- Casino machine visual language
- Generic slot game style
- Overly shiny jackpot effects
- Robotic interface feeling
- Common mobile game template look
- Reused generic UI kit feeling
- Any visible wording related to artificial generation
- Any asset names, comments, labels, or UI text that mention artificial generation

The game should look like a quiet magical pond world where fishing, collecting, and symbol matching are naturally integrated.

4. Game Concept

The core idea:

Players cast a fishing line into a peaceful pond. Each fish carries a symbolic mark such as Lotus, Moon, Coin, Lantern, Frog, Pearl, Bridge, or Koi Crest. Every three caught fish form a **Catch Reel** combination.

This is not a casino slot machine.
It is a fishing-based symbol matching system.

The loop is:

Cast → Catch Fish → Collect 3 Symbols → Resolve Combination → Earn Rewards → Upgrade Pond / Gear → Unlock New Fish → Repeat

The player should always have meaningful goals:

- Catch all fish
- Complete the fish codex
- Upgrade rods
- Upgrade floats
- Unlock charms
- Decorate the pond
- Increase Pond Harmony
- Improve Reel Luck
- Complete local missions
- Unlock local event rewards
- Discover rare combinations
- Reach full collection completion

5. Main Screens

Develop the following screens.

5.1 Splash / Start Screen

Purpose:

Introduce the game and let the player enter.

UI elements:

- Lucky Pond logo
- Pond background

- Koi swimming
- Lotus flowers
- Loading bar
- Tip card
- Tap to Start button
- Play as Guest button
- Version text

Example text:

- Lucky Pond
- Cast • Match • Collect
- Loading...
- Tip: Matching 3 rare symbol fish increases your combo rewards.
- Tap to Start
- Play as Guest

No login is required.

“Play as Guest” simply starts or continues a local save profile.

5.2 Home Lobby

Purpose:

Main hub.

UI elements:

- Top resource bar:
 - Coins
 - Pearls
 - Energy
- Large Lucky Pond logo
- Decorative three-symbol Catch Reel ornament
- Main Play button
- Daily Quest card
- Local Event card
- Collection button
- Pond Build button
- Events button
- Gear button
- Achievements button
- Settings button

The home screen should be calm, readable, and premium.

Do not include:

- Shop button
- Purchase button

- Store button for real money
- Subscription banner
- Ad reward button

If a “Shop-like” interface is needed, rename it to:

- Supply Shed
- Reed Storehouse
- Pond Supplies

It must only use earnable in-game resources, never real money.

5.3 Gameplay Screen

Purpose:

Main fishing gameplay.

UI elements:

- Pond playfield
- Fishing rod on the right side
- Floating bobber
- Fish swimming in pond
- Each fish has a symbol mark
- Catch Reel panel at top center
- Three symbol slots
- Luck Meter
- Combo indicator
- Today’ s Best sign
- Bait selector
- Cast button
- Skill buttons:
 - Lure
 - Ripple
 - Charm
- Pause button

Gameplay requirements:

- Player taps or holds Cast
- A target ripple appears
- Fish swim with simple local movement logic
- Player attempts to catch fish
- On successful catch, fish symbol is added to Catch Reel
- After 3 symbols, resolve reward
- Energy decreases per cast
- Energy restores slowly through local timer or local reward
- No paid refill option
- Fish should have visible weight and rarity on catch

- Caught fish should update codex locally
 - Caught fish should contribute to missions and achievements
-

5.4 Reward / Result Screen

Purpose:

Show result after catching 3 symbol fish.

UI elements:

- Result title
- Three resolved symbols
- Reward list
- Combo chain display
- Claim button
- Cast Again button
- Tip text

Example result titles:

- Moonlit Blessing
- Lotus Harmony
- Lantern Ripple
- Golden Current
- Pearl Whisper
- Frog Rain
- Quiet Fortune
- Soft Bloom
- Festival Crossing
- Night Prayer

Rewards:

- Coins
- Pearls
- Bait
- Gear materials
- Decor fragments
- Temporary local buffs
- Codex progress
- Harmony fragments

No paid buttons.

No purchase prompt.

No ad multiplier.

No store shortcut.

5.5 Fish Collection / Codex Screen

Purpose:

Show caught and locked fish.

UI elements:

- Fish Codex tab
- Decor tab
- Rods tab
- Charms tab
- Fish card grid
- Selected fish detail panel
- Rarity
- Habitat
- Symbol
- Collected date
- Best weight
- Bonus effect
- Collection progress bar

Fish examples:

- Lotus Carp
- Moon Carp
- Coin Koi
- Frogfish
- Lanternfish
- Pearl Eel
- Shadow Koi
- Bridge Minnow
- Reed Loach
- Shrine Goldfish
- Rainscale Carp
- Old Bell Koi
- Mist Arowana
- Tea Garden Guppy
- Willowfin
- Dawnscale Koi
- Night Lotus Eel
- Lanternback Carp

Rarities:

- Common
- Uncommon
- Rare
- Mystic
- Elder

Each fish should have:

- Name
 - Symbol
 - Rarity
 - Weight range
 - Habitat preference
 - Time preference
 - Bonus effect
 - Codex description
 - Unlock condition
 - First caught date
 - Best weight record
-

5.6 Pond Decoration / Build Editor

Purpose:

Let player decorate the pond and increase Pond Harmony.

UI elements:

- Pond preview
- Edit Mode label
- Placement grid
- Selected decor item
- Place button
- Rotate button
- Store button
- Save button
- Pond Harmony meter
- Next upgrade preview
- Category tabs:
 - Plants
 - Lanterns
 - Bridges
 - Stones
 - Ornaments

Decor examples:

- Lotus Cluster
- Lotus Bud
- Reed Patch
- Water Grass
- Stone Lantern
- Red Bridge
- Bamboo Fountain
- Shrine Ornament

- Moon Lantern
- Pearl Basin
- Moss Rock
- Willow Shade
- Festival Lantern
- Wooden Dock Tile

Each decor item should have:

- Harmony value
- Level
- Placement size
- Upgrade cost
- Unlock condition
- Description
- Visual state

Pond Harmony affects:

- Rare fish chance
- Reel Luck
- Combo reward multiplier
- Special fish appearance
- Unlocking new pond zones

5.7 Rods & Charms Upgrade Screen

Purpose:

Upgrade fishing gear.

UI elements:

- Rods tab
- Lines tab
- Floats tab
- Charms tab
- Rod list
- Selected rod detail
- Rod illustration
- Level
- Rarity
- Stat bars
- Equipped charm slots
- Materials
- Upgrade button

Stats:

- Cast Power

- Precision
- Reel Luck
- Rare Chance

Rod examples:

- Moon Bamboo Rod
- Lucky Lotus Rod
- Dragon Spine Rod
- Golden Koi Rod
- Jade Whisper Rod
- Reed Whisper Rod
- Lantern Hook Rod
- Mistwood Rod
- Old Bridge Rod

Charm examples:

- Lotus Charm
- Moon Charm
- Coin Charm
- Lantern Charm
- Frog Charm
- Pearl Charm
- Bridge Charm
- Rain Charm
- Bell Charm
- Shrine Charm

No paid upgrade.

All materials must be earned from fishing, missions, achievements, and local events.

5.8 Local Event Screen

Purpose:

A self-contained seasonal-style local event.

Use a sample event:

Lotus Festival

UI elements:

- Event hero banner
- Event guide character
- Countdown based on local time
- Missions tab
- Rewards tab
- Ranking tab can be local-only record board

- Mission progress bars
- Milestone reward track
- Claim buttons

Event tasks:

- Collect 50 Lanterns
- Catch 15 Rare or higher fish
- Upgrade any Pond Build 2 times
- Log in for 3 days
- Share event
- Catch 3 Moon symbol fish
- Complete 5 Catch Reel combinations
- Catch 1 Elder fish

Rewards:

- Coins
- Pearls
- Bait
- Decor
- Rod materials
- Event codex fish
- Harmony fragments

No online leaderboard.

If a ranking screen exists, it should be a local record screen only.

5.9 Achievements Screen

Purpose:

Long-term goals.

Achievement examples:

- First Cast
- Three Symbols
- Lotus Collector
- Moonlit Catch
- Rare Fisher
- Pond Keeper
- Harmony Builder
- Gear Tinkerer
- Golden Current
- Complete 10 Combos
- Catch 100 Fish
- Upgrade 10 Decor Items
- Unlock 20 Fish
- Reach Harmony 100

- Discover 30 Recipes
- Catch an Elder Fish

Rewards are local only.

5.10 Settings Screen

Purpose:

Basic local settings.

Options:

- Music volume
- Sound effects volume
- Haptics on/off
- Low motion mode
- ATT permission status display
- Reset local save
- Credits
- Privacy note

Privacy note text:

“This game runs locally on your device and does not require an online account.”

ATT status text examples:

- Tracking Permission: Allowed
- Tracking Permission: Denied
- Tracking Permission: Not Determined
- Tracking Permission: Restricted

Do not add external links unless specifically required.

5.11 Pond Supplies Screen

Purpose:

Replace paid shop with a local-only supplies screen.

This screen must not use real money.

UI elements:

- Title: Pond Supplies
- Tabs:
- Baits

- Materials
- Charms
- Decor
- Trade
- Local resource exchange only
- Earned resource costs only
- No dollar prices
- No IAP
- No ads
- No subscription
- No paid bundles

Example local supply items:

- Lotus Bait Pack
- Reed Bait Pack
- Moon Float Fragment
- Stone Lantern Fragment
- Pearl Dust
- Bamboo Thread
- Charm Thread
- Koi Token
- Harmony Seed

Example costs:

- 150 Coins
- 40 Pearls
- 6 Lantern Tokens
- 3 Pearl Dust
- 10 Reed Bundles

The screen should feel like a quiet storage shed, not a monetization shop.

Avoid words:

- Shop
- Buy
- Best Value
- Limited Time Offer
- Sale
- Bundle Deal
- Purchase
- Premium Pass

Use words:

- Trade
- Claim
- Unlock
- Exchange
- Supplies

- Storehouse
 - Earned
 - Collected
-

6. Symbol System

Symbols:

- Lotus
- Moon
- Coin
- Lantern
- Frog
- Pearl
- Bridge
- Koi Crest
- Reed
- Rain
- Bell
- Shrine

Each caught fish contributes one symbol.

After 3 caught fish, resolve combination.

6.1 Three of a Kind

Lotus + Lotus + Lotus

Result: Lotus Bloom

Reward: Pearls + Harmony fragment

Moon + Moon + Moon

Result: Moonlit Blessing

Reward: Rare fish chance buff

Coin + Coin + Coin

Result: Golden Current

Reward: Coins

Lantern + Lantern + Lantern

Result: Lantern Parade

Reward: Event tokens or special bait

Frog + Frog + Frog

Result: Frog Rain

Reward: Extra bait and bonus energy

Pearl + Pearl + Pearl
Result: Pearl Whisper
Reward: Pearls and codex bonus

Bridge + Bridge + Bridge
Result: Old Crossing
Reward: decor material

Rain + Rain + Rain
Result: Soft Rainfall
Reward: fish spawn refresh

Bell + Bell + Bell
Result: Quiet Chime
Reward: charm material

Shrine + Shrine + Shrine
Result: Shrine Glow
Reward: Harmony increase

6.2 Mixed Thematic Combos

Lotus + Moon + Koi Crest
Result: Quiet Fortune
Reward: balanced reward bundle

Coin + Lantern + Bridge
Result: Market Path
Reward: coins and decor material

Rain + Reed + Frog
Result: Spring Chorus
Reward: bait and rare pond spawn

Bell + Shrine + Moon
Result: Night Prayer
Reward: charm material

Pearl + Lotus + Rain
Result: Soft Bloom
Reward: Harmony increase

Bridge + Koi Crest + Lantern
Result: Festival Crossing
Reward: event progress bonus

Moon + Pearl + Bell
Result: Silver Chime
Reward: pearl bonus

Reed + Frog + Rain
Result: Marsh Song
Reward: bait refill

Coin + Koi Crest + Shrine
Result: Golden Offering
Reward: coins and harmony

Lantern + Moon + Pearl
Result: Night Lantern
Reward: rare fish chance buff

7. Local Economy

Resources:

7.1 Coins

Used for:

- Rod upgrades
- Decor upgrades
- Float upgrades
- Basic unlocks
- Local supply exchanges

Earned from:

- Catching fish
 - Symbol combos
 - Missions
 - Achievements
 - Daily local rewards
-

7.2 Pearls

Used for:

- Rare decor
- Charm upgrades
- Special fish unlocks

- Rare supply exchanges

Earned from:

- Rare fish
 - Pearl symbol combos
 - Achievements
 - Event milestones
-

7.3 Energy

Used for:

- Casting

Rules:

- Each cast costs 1 Energy
 - Energy max starts at 30
 - Energy restores by local timer
 - Energy can also be earned by combos and missions
 - No paid refill
 - No ad refill
-

7.4 Harmony

Represents pond quality.

Earned from:

- Decor placement
- Decor upgrades
- Fish collection milestones

Effects:

- Improves rare fish chance
 - Improves combo reward strength
 - Unlocks new habitats
 - Unlocks special fish
 - Improves daily quest quality
-

7.5 Materials

Examples:

- Bamboo Thread

- Pearl Dust
- Reed Bundle
- Lantern Wick
- Moon Shard
- Koi Token
- Stone Chip
- Charm Thread
- Soft Clay
- Willow Fiber

Used for:

- Rod upgrades
- Charm upgrades
- Decor upgrades
- Unlocking special items

8. Progression Loop

The game must be functionally closed-loop:

1. Player fishes
2. Fish provide symbols
3. Symbols create rewards
4. Rewards upgrade gear and pond
5. Upgrades increase fish quality and rare chances
6. New fish unlock new symbols
7. New symbols create new combinations
8. Combinations unlock more rewards
9. Player completes codex, achievements, and local events

The game should remain playable even after completing early tasks.

Add repeatable goals:

- Daily local quests
 - Best catch record
 - Combo chain record
 - Rare fish hunting
 - Pond Harmony optimization
 - Gear upgrade completion
 - Codex completion
 - Event milestone replay
 - Recipe discovery
 - Local supply exchange
-

9. Required Local Save System

Implement local persistence.

Store:

- Coins
- Pearls
- Energy
- Last energy restore time
- Materials
- Fish codex
- Caught fish count
- Best fish weight
- Rod levels
- Charm levels
- Float levels
- Decor inventory
- Pond layout
- Achievements
- Mission progress
- Event progress
- Recipe discovery
- Settings
- ATT prompt display status
- ATT authorization status cache
- Tutorial completion

Use local storage only.

Preferred approach:

- SwiftData or local JSON save file
- No cloud sync required
- No account system

Add safe reset function in Settings.

10. Technical Requirements

Use:

- Swift
- SwiftUI
- SpriteKit for pond gameplay if helpful
- Local persistence
- Portrait layout
- iPhone-first responsive layout

- Simple animation system
- Haptic feedback
- Local sound effects placeholders
- Asset catalog organization
- Native iOS ATT API
- Xcode-compatible project structure

Architecture should be modular and not template-like.

Do not use common naming patterns such as:

- GameManager
- AppState
- DataManager
- FishManager
- SlotManager
- PlayerData
- RewardManager
- UIManager
- AudioManager
- SettingsManager
- TrackingManager
- PermissionManager
- AnalyticsManager

Instead, use unique abstract names.

11. Unique Naming Rule

All class names, file names, function names, properties, namespaces, folders, model names, and variables must use unique abstract naming.

The naming should feel custom to this game.

Use names inspired by pond, ripples, wood, paper, fishing, lanterns, and quiet luck.

Examples of acceptable naming direction:

- PondRoot
- RippleLedger
- ReedVault
- CatchTide
- SymbolBloom
- LotusTrace
- MoonHook
- KoiArchive
- CharmNest
- WillowBoard
- LanternPath

- PearlCurrent
- BambooThread
- QuietPool
- CastDrift
- ReelBloom
- PondWhisper
- DockRune
- MistPocket
- HookTally
- HarmonyStone
- FishGlyph
- BloomChain
- RippleCache
- PondMark
- TackleNest
- ShrineLedger
- LocalPondSeed
- WaterlineState
- SoftCurrent
- LanternFold
- ReedScript
- KoiPattern
- MoonFloat
- LotusSignal
- LanternConsent
- PondPrivacyGate
- MistPermissionGate
- QuietSignalConsent

Examples:

Instead of `GameManager`, use `PondRoot`. Instead of `FishManager`, use `KoiArchive`. Instead of `RewardManager`, use `BloomLedger`. Instead of `SlotManager`, use `ReelBloom`. Instead of `PlayerData`, use `RippleLedger`. Instead of `SettingsManager`, use `QuietSwitchboard`. Instead of `InventoryManager`, use `ReedVault`. Instead of `AudioManager`, use `LanternEcho`. Instead of `TrackingManager`, use `LanternConsent`. Instead of `PermissionManager`, use `MistPermissionGate`.

Avoid generic variable names:

Do not use:

- data
- manager
- item
- value
- temp
- result
- reward
- config
- state
- model

- controller
- tracking
- analytics

Use specific abstract names instead:

- pondEcho
- catchGlyphs
- bloomYield
- reedCount
- moonTrace
- koiWeight
- driftCost
- pearlStack
- harmonyPulse
- lanternMark
- currentFold
- castThread
- consentRipple
- mistSignal
- privacyLantern
- quietGate

All naming should be internally consistent and distinctive.

12. Suggested Project Structure

Use a unique structure like:

LuckyPond/

- PondRoot/
- PondRootApp.swift
- PondRootShell.swift
- Waterline/
- WaterlineState.swift
- RippleLedger.swift
- LocalPondSeed.swift
- CatchDrift/
- CastDriftScene.swift
- HookThread.swift
- FishGlyph.swift
- KoiMotionWeave.swift
- RippleAimMark.swift
- ReelBloom/
- SymbolBloom.swift
- BloomChain.swift
- BloomLedger.swift
- BloomRecipeBook.swift

- KoiArchive/
- KoiPattern.swift
- KoiCodexView.swift
- KoiDetailPanel.swift
- ReedVault/
- ReedVault.swift
- TackleNest.swift
- DecorNest.swift
- MaterialPouch.swift
- PondWhisper/
- PondDecorationView.swift
- HarmonyStone.swift
- DecorPlacementGrid.swift
- LanternFold.swift
- MoonHook/
- RodsAndCharmsView.swift
- MoonFloat.swift
- CharmNest.swift
- TackleUpgradePanel.swift
- WillowBoard/
- HomePondView.swift
- StartPondView.swift
- SettingsPondView.swift
- AchievementsPondView.swift
- PondSuppliesView.swift
- LotusFestival/
- LotusFestivalView.swift
- LanternPath.swift
- FestivalMilestoneTrack.swift
- QuietEcho/
- LanternEcho.swift
- HapticRipple.swift
- PondPrivacy/
- LanternConsent.swift
- MistPermissionGate.swift
- PondPrivacyGate.swift
- BrushwoodAssets/
- AssetNotes.md
- GeneratedSprites/
- GeneratedIcons/
- GeneratedPanels/
- GeneratedBackgrounds/
- GeneratedEffects/

13. Required UI Assets

Create all required assets in a consistent handcrafted style.

13.1 Logo

Create:

- Lucky Pond main logo
 - Small icon logo
 - App icon concept
 - Launch logo
 - Loading logo
-

13.2 Fish

Create fish sprites:

- Lotus Carp
- Moon Carp
- Coin Koi
- Frogfish
- Lanternfish
- Pearl Eel
- Shadow Koi
- Bridge Minnow
- Reed Loach
- Shrine Goldfish
- Rainscale Carp
- Old Bell Koi
- Mist Arowana
- Tea Garden Guppy
- Willowfin
- Dawnscale Koi
- Night Lotus Eel
- Lanternback Carp

Each fish needs:

- Idle sprite
 - Swim sprite variant
 - Turn sprite variant
 - Caught pose
 - Codex card portrait
 - Symbol mark overlay
-

13.3 Symbols

Create symbol icons:

- Lotus
- Moon

- Coin
 - Lantern
 - Frog
 - Pearl
 - Bridge
 - Koi Crest
 - Reed
 - Rain
 - Bell
 - Shrine
-

13.4 UI

Create:

- Wooden buttons
 - Green claim buttons
 - Parchment panels
 - Resource bars
 - Progress bars
 - Catch Reel symbol windows
 - Tab buttons
 - Bottom navigation icons
 - Reward cards
 - Tooltip panels
 - Quest panels
 - Codex cards
 - Upgrade cards
 - Decor cards
 - ATT pre-permission card
 - Settings cards
 - Local supplies cards
-

13.5 Pond Decoration

Create:

- Lotus Cluster
- Lotus Bud
- Reed Patch
- Water Grass
- Stone Lantern
- Red Bridge
- Bamboo Fountain
- Shrine Ornament
- Moon Lantern
- Pearl Basin
- Moss Rock

- Willow Shade
 - Festival Lantern
 - Wooden Dock Tile
-

13.6 Gameplay

Create:

- Fishing rod
 - Fishing line
 - Bobber
 - Hook
 - Ripple effects
 - Catch splash
 - Symbol reveal effect
 - Combo glow
 - Gentle water surface background
 - Fish shadow
 - Pond reflection overlay
 - Floating lotus particles
 - Lantern flicker effect
-

13.7 Backgrounds

Create:

- Dawn pond
 - Day pond
 - Sunset pond
 - Night pond
 - Lantern festival pond
 - Pond build editor background
 - Codex parchment background
 - Rod upgrade background
 - Achievement background
 - Settings background
 - Pond Supplies background
-

14. Animation Requirements

Implement simple but polished animations:

- Fish idle swim
- Fish turn
- Water ripple

- Cast arc
- Bobber bounce
- Hook pull
- Catch splash
- Symbol card reveal
- Catch Reel fill
- Combo glow
- Reward pop
- Button press bounce
- Pond lantern flicker
- Lotus floating drift
- Decor placement glow
- Upgrade pulse
- Milestone unlock glow
- ATT pre-permission modal fade
- Settings toggle movement

Animations should be subtle and calm, not explosive.

15. Gameplay Logic Details

15.1 Fish Spawn

Fish spawn is based on:

- Pond Harmony
 - Current rod stats
 - Bait type
 - Local event status
 - Time of day
 - Random seed
 - Unlocked habitats
 - Active local buff
-

15.2 Catch Chance

Catch chance uses:

- Cast Power
 - Precision
 - Fish rarity
 - Bait match
 - Float bonus
 - Harmony bonus
 - Active charm bonus
-

15.3 Reel Luck

Reel Luck affects:

- Chance of higher-value symbol combinations
 - Chance to pull rare symbol fish
 - Chance to extend combo chain
 - Chance of bonus material drop
-

15.4 Combo Chain

After each 3-symbol resolution:

- If symbols form a valid recipe, combo chain increases
- Higher chain improves local rewards
- Chain resets after failed or weak combination
- Player can continue with Cast Again if enough energy

No purchase option should appear.

16. Local Mission System

Create local missions.

Daily local missions:

- Catch 10 fish
- Catch 3 Lotus symbol fish
- Complete 2 Catch Reel combinations
- Earn 500 Coins
- Upgrade 1 decor item

Long-term missions:

- Catch 100 fish
- Unlock 20 fish
- Reach Harmony 100
- Upgrade 5 rods
- Discover 20 symbol recipes
- Complete Lotus Festival milestones
- Catch 1 Elder fish
- Reach Combo Chain 5

Mission progress must persist locally.

17. Tutorial

Create a short interactive tutorial:

- Step 1: Tap Play
- Step 2: Tap Cast
- Step 3: Catch first fish
- Step 4: Explain symbol fish
- Step 5: Catch 3 fish
- Step 6: Resolve Catch Reel
- Step 7: Claim reward
- Step 8: Upgrade pond or rod

Tutorial text should be short and natural.

Example text:

- “Cast into the pond.”
- “Each fish carries a symbol.”
- “Catch three fish to form a Catch Reel.”
- “Good matches bring better rewards.”
- “Decorate your pond to attract rarer fish.”

No long paragraphs inside tutorial UI.

18. App Store Safety Positioning

This app should present itself as a relaxing fishing and collection game.

Avoid visible UI wording:

- Slot machine
- Casino
- Jackpot
- Bet
- Spin
- Gamble
- Payout
- Real money
- Premium pass
- Purchase
- Sale
- Best value

Use safer wording:

- Catch Reel
- Symbol Match

- Combo
- Blessing
- Reward
- Collection
- Pond Harmony
- Lucky Current
- Bloom Chain
- Catch Result
- Pond Supplies
- Exchange
- Claim
- Unlock

Visible UI should not look like gambling.

19. Privacy / Local-First Positioning

The app is local-first.

Include a privacy note in Settings:

“This game runs locally on your device and does not require an online account.”

ATT-related note:

“Tracking permission is optional. Lucky Pond remains fully playable regardless of your choice.”

Do not add:

- Required login
 - Cloud save
 - Server account
 - External leaderboard
 - Online matchmaking
 - Third-party ad tracking
 - Third-party analytics tracking
-

20. Final Deliverables

Produce:

1. Complete SwiftUI iOS project
2. SpriteKit gameplay scene if helpful
3. Native ATT permission implementation
4. Required `Info.plist` ATT key
5. All local save logic

6. All screens listed above
7. All game models
8. All local progression systems
9. All UI assets
10. All icon assets
11. All fish assets
12. All decor assets
13. All placeholder sounds
14. All animations
15. App icon
16. Launch screen
17. Complete README
18. Build and run instructions

The game should compile and run in Xcode.

No placeholder TODO for core gameplay.

No unfinished navigation.

No broken buttons.

No paid feature remnants.

No online feature remnants.

No ad feature remnants.

No real-money pricing remnants.

No generic manager naming.

No copied template structure.

The result should be a complete offline iOS game prototype with full functional loop.

21. Quality Bar

The final game should feel:

- Peaceful
- Premium
- Handcrafted
- Complete
- Playable
- Distinctive
- Non-generic
- English-only
- Offline-first
- Rewarding without payment
- Visually consistent with the provided design drafts
- Technically clean
- Easy to build in Xcode
- Clear enough for further expansion

The most important design principle:

The game is not about spinning. It is about fishing symbol creatures from a lucky pond and letting their symbols bloom into rewards.

22. Implementation Priority

Build in this order:

1. Project skeleton and portrait-only configuration
2. Local save layer
3. Start screen and Home Lobby
4. Gameplay fishing scene
5. Symbol matching and Catch Reel resolution
6. Reward screen
7. Codex system
8. Gear upgrade system
9. Pond decoration system
10. Local missions and achievements
11. Local event system
12. Pond Supplies local exchange screen
13. Settings screen
14. ATT permission flow
15. Asset generation and integration
16. Animation polish
17. README and final cleanup

Core gameplay must work before visual polish.

23. Asset Generation Prompt Direction

When generating assets, follow this style:

Warm handcrafted pond garden game art, cozy wooden UI, parchment panels, koi fish, lotus flowers, lily pads, bamboo, rope bindings, stone lanterns, soft water ripples, calm premium mobile game style, English UI, vertical iOS layout, no neon, no cyber, no sci-fi, no casino machine look, no robotic interface, no generic template feeling.

Generate assets as cohesive sets:

- Same lighting direction
- Same outline thickness
- Same texture language
- Same wood material
- Same parchment material
- Same button depth
- Same icon shape language
- Same fish rendering style

Asset filenames should be unique and thematic.

Example asset names:

- lotus_carp_drift_idle
- moon_carp_soft_turn
- coin_koi_caught_pose
- reed_button_wide_press
- parchment_panel_soft_fold
- lantern_ripple_glow
- catch_reel_window_lotus
- pond_harmony_meter_wood
- moon_bamboo_rod_full
- quiet_claim_button_green
- mist_permission_card
- lantern_consent_badge

Avoid generic filenames:

- button1
- panel
- fish
- icon
- bg
- sprite
- asset
- image
- ui_button

24. Final Reminder

Create the complete game as if it will be handed directly to a tester.

The tester should be able to:

- Install and launch
- Tap to start
- See ATT permission flow
- Enter the home lobby
- Start fishing
- Catch fish
- Fill the Catch Reel
- Receive rewards
- Upgrade gear
- Decorate pond
- Complete missions
- Unlock fish
- Save progress
- Relaunch and continue

- Reset save from settings

Everything must be local, playable, and complete.
